Fish protection System

PROCOM SYSTEM

NEPTUN

INNOVATIVE FISH PROTECTION TECHNOLOGY

The **NEPTUN** system provides effective and safe protection for fish, minimizing the risk associated with their migration near water infrastructure.

NEPTUN system principles of operation

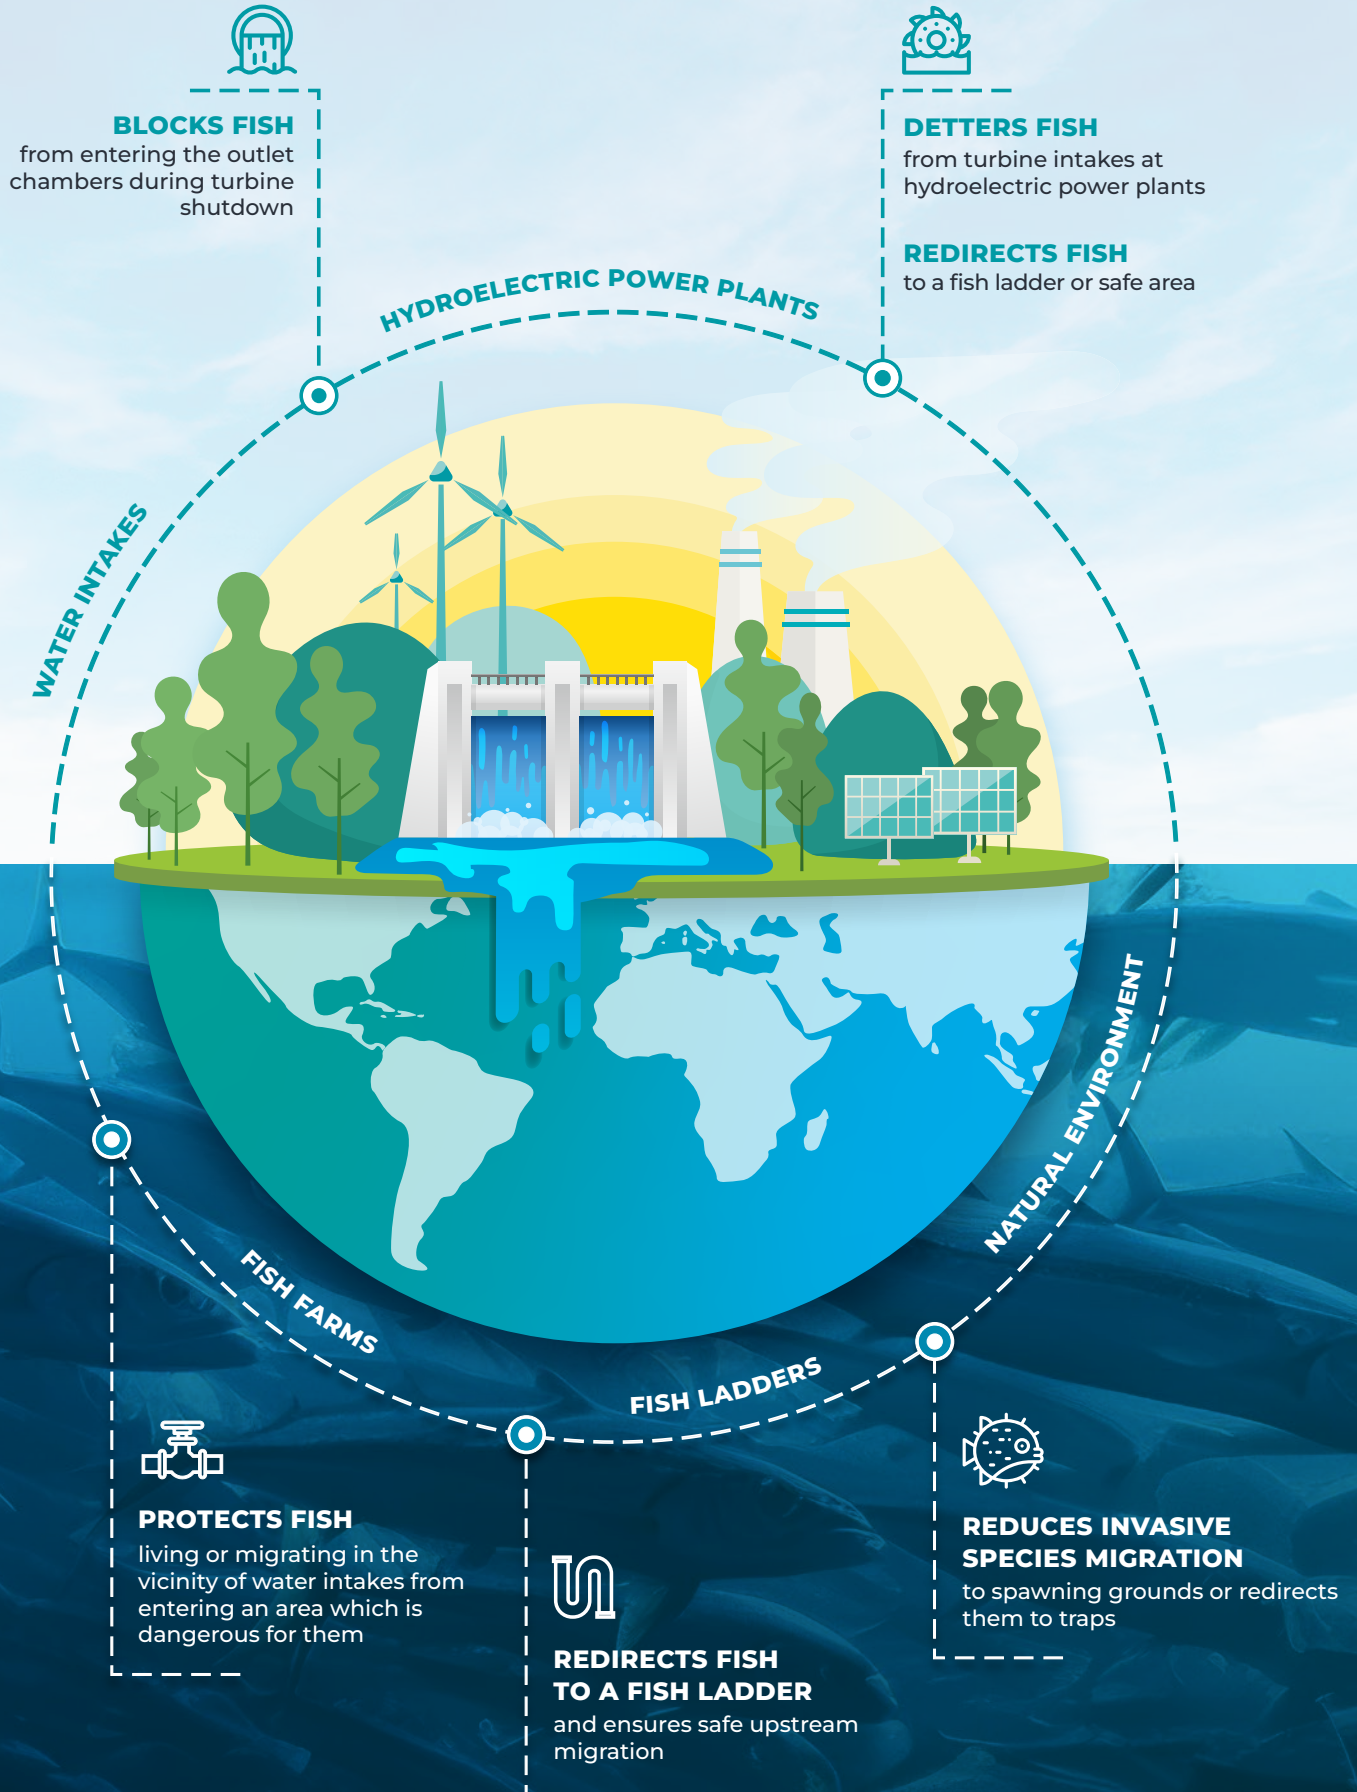

- ✓ Generates an increasing electric field strength in water
- ✓ Affects the neuromuscular system of fish, changing their movement direction
- ✓ Generates a safe electric field that does not shock fish or other aquatic organisms

Advantages of the **NEPTUN** system

- ✓ High effectiveness - up to 100%
- ✓ Wide range of applications regardless of hydrological conditions
- ✓ Easy to install in existing and new structures
- ✓ High resistance to mechanical damage and ice
- ✓ Low cost of electricity consumption
